

MediBridge Platform

Project Documentation

1. Project Overview

MediBridge is a digital platform that connects **pharmaceutical companies** with **doctors** without using Medical Representatives.

The platform allows companies to send messages about new medicines directly to doctors. Doctors can check these messages, give feedback, and earn money.

Goals:

- Reduce marketing costs for companies
 - Give extra income to doctors
 - Help doctors get the latest medical information
-

2. Problem Statement

Traditional marketing uses **Medical Representatives** to visit doctors and show new medicines.

Problems with this system:

- Very high cost for companies
- Not efficient to reach all doctors
- Takes doctors' time
- Hard to track results

MediBridge is a **digital solution** to fix these problems.

3. Business Model

MediBridge uses **Pay Per Doctor Message**.

Payment

Companies pay to send a message to a doctor.

Example:

Doctor Price = 50 EGP

Platform Fee = 10 EGP

Doctor Earnings = 40 EGP

Each doctor can have a **different price** based on:

- Experience
- Specialization
- Activity on the platform

The price is determined by the Admin.

4. User Roles

There are 3 types of users.

1. Doctor

Doctor can:

- Receive messages about medicines
 - Check content
 - Send feedback
 - Earn money
-

2. Pharmaceutical Company

Company can:

- Create ad campaigns
 - Choose target doctors
 - Send messages
 - See interaction
-

3. Admin

Admin can:

- Check doctor accounts
 - Check company accounts
 - Manage payments
 - Monitor ads
 - See statistics
-

5. Core System Flow

Doctor Registration

1. Create account
 2. Upload proof of being a doctor
 3. Admin checks account
 4. Activate account
-

Company Registration

1. Create account
 2. Enter company info
 3. Admin checks account
 4. Activate account
-

6. Advertisement System **نظام الاعلانات**

Messages contain:

- Title
- Image or Video
- Voice note (optional)
- Clinical research info
- Description

Messages **appear only once a day at the start of the day** and disappear at the end.

7. Queue System

If messages exceed doctor's daily limit, they go to a **queue**.

Example:

Doctor Daily Limit = 5 messages

Queue:

- 1 Pfizer
- 2 Eva Pharma
- 3 Novartis
- 4 GSK
- 5 Sanofi

Extra messages show the next day.

8. Doctor Interaction

After seeing the message, the doctor can:

- Accept
- Reject
- Send Feedback

Doctors earn money even if they reject the message.

9. Doctor Settings

Doctor can set:

- Daily message limit
- Minimum weekly requirement
- **Notification settings**

10. Minimum Weekly Requirement

Each doctor must see a **minimum number of messages per week**.

Example:

Minimum = 5 messages per week

If the doctor does not meet it:

1. Warning
2. Reduce messages
3. Suspend account temporarily

11. Doctor Wallet

Doctor has a **wallet inside the platform**.

Can:

- See earnings
- Withdraw money

12. Company Wallet

Companies also have wallets.

Can:

- Add money

- Pay for ads
- See campaigns

Money is **deducted immediately when sending a message**.

There is an option to hold money until the doctor receives the message

13. Doctor Filtering

Companies can select doctors by:

- Specialization
 - Experience
 - Location
 - Activity on platform
 - Price
-

14. Doctor Activity Score

Each doctor has an **Activity Score** based on:

- Response speed
- Number of messages checked
- Quality of feedback

Example:

Doctor Score = 92% “with a professional UI”

15. Admin Dashboard

Admin can:

- Manage users
- Check accounts
- Monitor ads

- Manage payments
 - See system statistics
-

16. Security

Platform protects:

- Passwords
 - Doctor verification
 - Medical data
 - User activities
-

17. Technology Stack

Frontend:

- HTML
- CSS
- JavaScript
- React

Backend:

- .NET using C#

Database:

- Microsoft SQL Server
-

***18. Future Improvements**

- AI summary for messages
- Advanced analytics for companies
- Priority messages
- Mobile application

- Recommendation system
-

19. Expected Impact

MediBridge will:

- Reduce marketing costs for companies
- Increase access to medical information
- Creating extra income for doctors
- Build a network between doctors and companies
